

Solar Powered • Portable • Proactive Video Monitoring

Unlock the Power of Proactive Video Monitoring (PVM) Technology

- ◆ Real-time Intruder Detection: Stay ahead of threats with cutting-edge PVM technology that detects intruders as they occur, ensuring immediate response.
- ◆ Voice-Down Deterrence: Prevent incidents before they escalate by issuing customizable audio warnings, effectively deterring potential intruders.
- ◆ Verified Dispatch: Rest assured knowing that every alarm is verified by our US-staffed, UL Central Station before dispatching authorities, reducing false alarms.
- ◆ Detailed Incident Reports: Receive detailed incident reports with timestamped photo evidence, providing valuable insights for future security measures.

Application Across Industries:

- ◆ Construction: Protect valuable equipment and materials from theft and vandalism.
- ◆ Industry: Ensure the security of your facilities and assets with proactive monitoring.
- ◆ Oil & Gas: Safeguard remote sites and infrastructure from intruders and unauthorized access.
- ◆ Utilities: Protect critical infrastructure and prevent disruptions to essential services.
- ◆ Government & Law Enforcement: Enhance public safety and security with advanced monitoring solutions.
- ◆ Live Venues: Provide a safe environment for attendees and performers at concerts, festivals, and sports events.
- ◆ Border Patrol & Military: Monitor and secure borders and military installations with precision and efficiency.

ASI Fire & Security offers a comprehensive security solution with programmable event detection, customizable audio warnings, verified dispatch, and detailed incident reports. Experience unparalleled security and peace of mind with ASI Fire & Security's Proactive Video Monitoring technology.

FEATURES

Powered by 1200W solar panels, backup batteries & generator
Proactive video monitoring of intruders or unauthorized contractors
Four (4) IP PTZ, IR Cameras (Thermal cameras & lighting available)
Event-driven and real-time customizable
Live/Recorded Video Viewing via Smart device
LTE Cellular Communications
Two (2) week minimum on-board recording storage
Environment-resistant robust design, able to withstand term deployment

Providing peace of mind since 1974
